CERTIFICATE OF COMPLIANCE

Perfluoroalkyl & Polyfluoroalkyl Substance Pollution

Per and Poly Fluoroalkyl substances (PFAS) are man-made Carbon and Fluorine based chemicals that have been used in a wide range of consumer and industrial products due to their resistance to grease, oil, water and heat. PFAS include PFOA, PFOS, PTFE, FKM, PVDF. PFAS have various applications in electronic products, such as protective/water-resistant coatings, and do not easily degrade. They are persistent and bio-accumulative in nature, and so are referred to as forever chemicals.

PFAS are highly regulated due to their toxicity, and persistence in the environment and have been banned or restricted in the US, EU and Canada.

We hereby certify that our products do not contain PFAS (Per and Poly Fluoroalkyl Substances) based on information and or testing supplied by the original manufacturing facilities. The information provided here is accurate to the best of our knowledge at the present time.

A handwritten signature in black ink, appearing to read 'Arthur Baier', is written over a horizontal line.
