End of Life Notice

Discontinuance of “Y5V” Material Capacitors

To whom it may concern:

Please be advised that S-P International's, Sanyo-CAP ceramic capacitors, are no longer available in “Y5V” material. This applies to all MLCC SMD and leaded parts as well as ceramic disk capacitors. Capacitors using this material should not be used in new product designs.

There may be some specific value/voltage combinations that are still available due to current stock situations or factory availability or raw material. Contact S-P International for current availability.

This change has been made necessary due to the industry wide lack of demand for this material and factory phase outs of production.

It is suggested that for new designs, capacitors using X7R or X5R material should be used where ever possible.

Respectfully,

Arthur Baier
Director of Quality Control and Compliance
